

### Solids Control Tech

Looking for qualified candidates for full time Solids Control Technicians in all locations. You would be responsible for overseeing the mechanical/electrical processes which are used to provide enhanced drilling properties and recycle drilling mud through closed loop systems. You would travel to the rig site for setting up. Tearing down, monitoring and maintaining centrifuges, and completing all required paperwork. The work schedule is normally a 12-hour shift but may be longer depending on the activity at the rig site with 14 days on, 7 days off rotation. Dewatering experience preferred. Please send resume to [Kathy.grasteit@dtservices.com](mailto:Kathy.grasteit@dtservices.com) .
